

OUR HISTORY

- **1991** Siam Land Flying Co., Ltd. is established as a private flight department to support the travel requirements of the groups own executives.
- **1998** Siam Land Flying starts to offer private charter service to the wider market under the brand name 'Executive Wings'. Executive Wings aims to serve the growing demands of the travelling passengers who would like to fly for business and pleasure to chosen destinations and appreciate a high level of convenience, exclusivity, luxury and privacy in the Asian region and beyond.
- **1999** Siam Land Flying Co., Ltd. continues to expand its services by adding Air Ambulance services under the brand name of "**Medical Wings**". Medical Wings offers 'bed-to-bed' transfers for all types of patients and age groups experiencing severe medical conditions including pre and post natal and pediatric patients. Medical Wings also provides patient escort services for transfers using commercial airline services to global destinations.
- **2015** Medical Wings achieves the CAMTS standard from the US based Commission on Accreditation of Medical Transportation Systems and becomes the first Asian operator to achieve this prestigious recognition. CAMTS recognizes the high quality of care and treatment that Medical Wings provides to both the patient and their companions.
- **2016** Medical Wings achieves the EURAMI standard of the European Aeromedical Institute. The attainment of the EURAMI accreditation is evidence of the consistent quality of service which Medical Wings clients rely upon for their requirements in the Asian region and beyond.
- **2018** Medical Wings achieved a full accreditation for international fixed wings and medical escort services from CAMTS and CAMTS GLOBAL and become the first operator in Asia and only the second operator worldwide to achieve CAMTS 'Dual Accreditation'. This achievement represents a significant recognition of the care and safety standards that we employ when transporting the patients and their companions.

AVIATION MEDICAL SPECIALISTS 

OPERATING THOUGHOUT ASIA 

WHAT WE DO

We are the "ICU in the Sky"

- Most of our cases involve critically ill patients requiring ICU conditions such as ischemic heart attack, emphysema, brain injuries, high risk pregnancy, acute myocardial infarction, stroke, multiple traumas and septicemia which may cause multiple organ failure.
- We provide services ranging from 'bed-to-bed' air ambulance transfer for patients with the most urgent medical needs through to non-emergency 'patient escort' services within the region and beyond, operating 24 hours-a-day, 7 days per week.
- Our medical staffs are certified in Aviation Medicine, Emergency Medicine, Critical Care Transport, Pediatric Critical Care Transport and these can be augmented by other medical specialists based on the medical condition, the nature of any injury or the age of the patient.
- Our medical team evaluate and assess all patients prior to transfer to ensure that their condition is suitable for the flight and we are able to transport them safely to their destination.
- Medical Wings clients include many of the world's largest insurance and assistance companies as well as private individuals, their families and companions.

We offer a “ONE STOP SERVICE”

- We are able to offer a ‘one stop service’ by owning or controlling all the major aspects of the patient transport process. Medical Wings own air ambulance fleet of Hawker 800/850XP’s and King Air 350’s are ideally suited to air ambulance missions.
- Our medical flight crew is on hand throughout the patient transport procedure to ensure that the patient’s condition is continually monitored. This enables real time decisions to be taken to manage any risks or complications and ensure that the patient arrives safely at their destination.
- The vast experience of our medical coordinators enables them to manage and liaise with all parties involved in the patient transfer process, including the hospital staff, the patient’s family and any insurance or assistance company involved.
- Our highly experienced flight operations team are able to undertake the most demanding missions safely and efficiently. Our operational knowledge and experience allows us to operate throughout the Asian region and beyond.

We own our “AIR AMBULANCE FLEET”

- Medical Wings operates four high performance aircraft in air ambulance configuration, including Hawker 800XP/ 850XP and Super King Air 350’s. These fully pressurized aircraft provide patients with the optimum environment for medical transportation and are equipped with the state-of-the-art equipment.
- Our air ambulances can accommodate 1-2 patients, medical flight crew and carry up to 2 companions on board so that they can accompany their family or loved ones.
- Our aircraft are strategically based at Don Mueang International Airport in Bangkok, and from here we are able to provide optimal response times throughout Asia.

We provide “EXCELLENT CARE”

- Medical Wings team of highly trained doctors and nurses have state-of-the-art medical equipment to enable them to provide the highest levels of medical care throughout the patient transfer process.
- Our medical flight crews help determine which service is best suited for the patients needs and medical condition, whether that is a dedicated air ambulance service, a commercial stretcher or medical escort.
- Each air ambulance mission is supported by a minimum of a two-person medical flight crew that consists of a critical care trained flight doctor and flight nurse who attend the patient throughout the transportation process. Additional crew are assigned based on the patient’s condition.
- Our repeat clients, such as the hospital groups and international insurance and assistance companies, depend upon Medical Wings quality of care and reliability of service to support their patients and transfer them safely to their destination.

We are committed to “SAFETY”

- Achieving the CAMTS and EURAMI standards demonstrates our commitment to safety and quality of service in the air ambulance sector. Our whole team, from the medical crew to the flight operations and maintenance teams work to deliver this on a daily basis.
- Our highly experienced flight crew are trained by internationally recognized training organizations and are committed to safe operations in order to deliver the patients and their companions to their destination.
- Our air ambulances are operated and maintained to international standards and carry insurance underwritten by some of the worlds largest insurers.
